BUYSPURIFY

Product & Solution Overview

Community infrastructure, household purification and partner-ready support

INVEST · DESIGN · BUILD · OPERATE

A connected product portfolio

BUYSPURIFY combines water-treatment equipment with project engineering and long-term operating support. Community systems are quote-led; household systems can support project samples, distribution programmes and direct orders where available.

BS-100 Smart Community Water Unit

Position	Details
Capacity / format	80–120 households per unit
Core features	100 L/h recommended production; multi-stage RO and UV; QR/IC access; connected monitoring

How we support partners

Product documentation, remote guidance, parts planning, project engineering and OEM/ODM development are scoped to the product and market.

Stage	BUYSPURIFY support
Discover	Market, application, source-water and compliance review
Configure	Product selection, system sizing, branding and packaging scope
Validate	Sample review, technical confirmation and commercial terms
Deliver	Production, quality checks, documentation and shipping coordination
Support	Parts planning, troubleshooting and programme review

Important

Specifications, availability, certifications, lead times and commercial terms must be confirmed in the final quotation or sales agreement. This overview is not a substitute for a site assessment or signed technical schedule.
